SHE-CARE

Cause She Matters

CREW-X

Women safety has become the utmost priority of the Indian government considering the increasing cases of crime against women and also women's are not aware about the schemes launched by Indian government to empower them.

According to the Office for National Statistics (ONS), around **49%** of women reported feeling unsafe walking alone after nightfall in a busy public place and also **81.3%** of female workforce in India belongs to rural women and not aware about government schemes.

CREW-X

What is SHECARE ?

SHECARE is designed keeping in mind the concept of personal safety. It incorporates all the essential features GPS tracking, emergency contact number etc.

No
Login
Women's safety in communities and cities
Awareness about government schemes regrading women's empowerment
Exercise
Notes for daily essential chores to be done
Going outside
Inform the app about purpose of visit and set the app on alert mode
Reminder after every particular span of time
Credential match while reminder cancellation
No
Current location sent to dear one (SOS)
yes
Do nothing

Product Innovations

Multi Device Support
We can extend our app to the smart watches which will deduce phone dependency for the user

Strict - Location Alert
In Future, we are planning to add a alert in case of location area breaches which ultimately used for women's safety.

More Generic
We are planning to make our app more generic by adding more functionality and services

Multi Lingual
In Future, we are planning to make our app multi lingual

Web Connectivity
We will increase the connectivity of app by extending it to a proper website

Further Applications

Security/Surveillance

SHECARE can be extended to surveillance like a mechanism for security guard to check the consciousness of guards during night duty.

Child - Care

SHECARE can be extended to child security like a mechanism for children to maintain their security standard when they are away from home.

Alzheimer disease

SHECARE can be extended to provide virtual guardian system to Alzheimer patient so that they can feel independent while going outside.
